

Millennium Evo

Single-Point Battery Watering System

With single-point watering, your battery maintenance is now faster, safer, and more reliable than ever before! Millennium Evo consists of automatic shut-off valves, interconnected with tubing, which replace existing vent caps. The tubing is attached to a quick coupler that is connected to a water supply. Once connected, water flows until each battery cell independently reaches the correct electrolyte level.

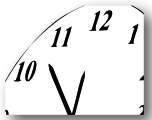

Save Money

Flow-Rite's ROI calculators show how much an operation will save in labor costs. Other cost savings include cleaner battery tops, equipment and floors.

Extend Battery Life & Performance

Properly watered batteries last longer and perform better. Both overfilling and underfilling will result in loss of capacity and life expectancy.

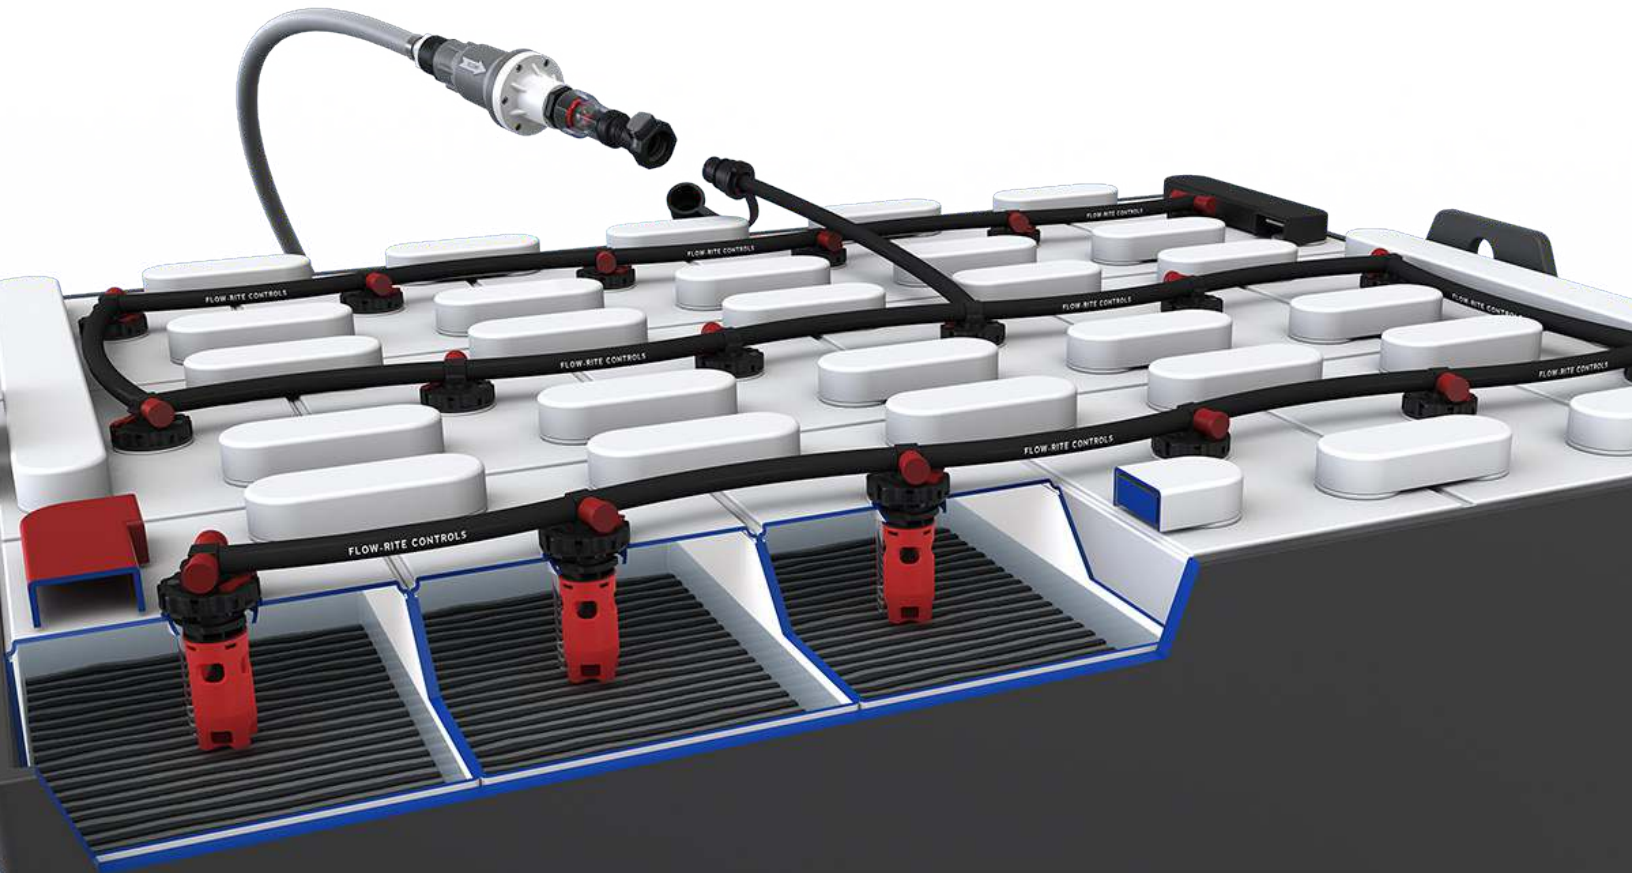

Faster

Snap-on / snap-off water supply connections and fast filling allow for you to fill each battery in less than 1 minute.

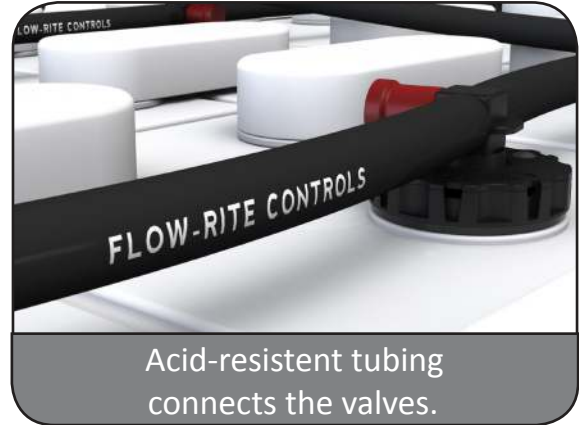

Safer

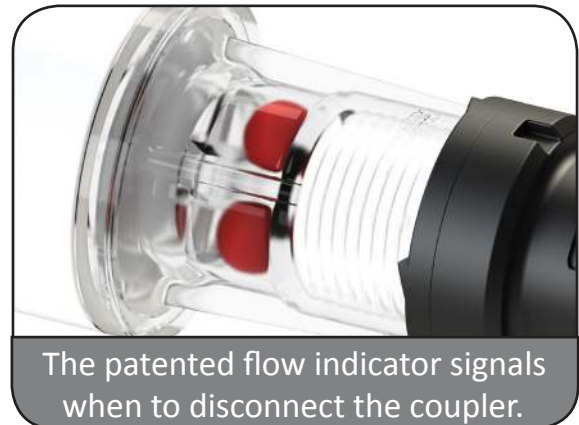

Fill batteries without opening vent ports. Avoid battery acid burns, ruined clothing and noxious fumes.

Easy to install ...

... and simple to operate!

Features

- Patented Three-Port 360° Swivel Tees
- Acid-Resistant Polypropylene Tubing
- Wide Pressure Range
- Many Water Supply Options Available
- Optional Flame Arrestors, Optical Level Indicators and Flip-Top Hydrometer Access Ports
- 5 Year Warranty
